- ✓ FREE Proximity Cards/Fobs
- ✓ UK Power Adaptor
- ✓ Network Cable
- ✓ Back Plate and Fixtures
- ✓ Instruction Manual
- ✓ 1 year Hardware Warranty
- ✓ 1 Year Free Support

### Employees clock in and out simply by waving their card or fob in front of the clocking terminal.

CardVision speeds up the clocking in and out process, no queuing or waiting in line. Being non-contact, CardVision has proven to be much more reliable and easier to use than traditional clocking in machines.

When employees clock in and out the clocking data

is sent across the network to your PC or can be collected on a USB memory stick. The CardVision software then automatically calculates each employee's basic hours and overtime with accuracy and according to your working patterns. The user-friendly software allows you to view everything on screen and edit data as required, before printing reports or exporting data into Sage payroll.

## Ready to fit straight from the box clocking in solution

Based on an award winning concept, CardVision was developed to give you exactly what you expect from a clocking in system without all the fuss and complication. It merges the latest high tech advances with great flexibility, yet it is simplicity itself.

The easily installed clocking terminal and instantly useable software interface ensure that

that the system can be painlessly introduced to your office environment.

**And with 12 months free support included in the package you have the reassurance of knowing that we are at your disposal if you ever needed help or advice.**

CardVision clocking in system is available in 4 packages defined only by the number of employees.
